Professions Data Book 2010/2011**

Executive Summary

The Georgia Board for Physician Workforce (GBPW) has been fortunate to be able to include its physician workforce survey with the Georgia Composite Medical Board (GCMB) survey as part of the renewal process since 1986. This 2010 data set marks the 24th year the GBPW has examined the supply and distribution of Georgia's physicians using data from license renewals. For the first time, this report examines the supply and distribution of Georgia's physician assistant workforce. The Board recognized a need to begin gathering data from physician assistants to better understand their role in providing care to Georgia's citizens.

Physician Summary:

- ◆ Between 2000 and 2010:
 - The population in Georgia increased by 18.3%, whereas the physician population increased by 26.0%
 - The increase for physicians in the five primary care/core specialties was 14.5%. The increase for specialist physicians was 36.7%

- ◆ Between 2008 and 2010
 - Georgia's physician workforce experienced a gain in total rate of both primary care/core specialties (family medicine, internal medicine, pediatrics, OB/GYN, and general surgery), and specialists
 - ◇ Of the primary care/core specialties, family medicine, internal medicine, and pediatrics all increased in number and rate per 100,000 population. OB/GYN and general surgery decreased in number and rate per 100,000 population
 - The percentage of the workforce in specialized categories increased from 56.0% to 56.2%

- ◆ 2010 was the first year since physician workforce planning began that every county in Georgia had at least one physician who practiced primarily in that county. However:
 - Six counties had no family medicine physician
 - 31 counties had no internal medicine physician
 - 63 counties had no pediatrician
 - 79 counties had no OB/GYN
 - 66 counties had no general surgeon

Physician Assistant Summary:

- ◆ In 2011, there were 2,176 licensed physician assistants in Georgia
 - 1,840 were practicing full time
 - 78.7% were practicing in a Metropolitan Statistical Area
 - 49 counties did not have a physician assistant that practiced primarily in that county.

- ◆ 29.7% of the physician assistant workforce worked in Primary Care. 71.4% of those physician assistants worked in a Metropolitan Statistical Area
- ◆ Of those working in Primary Care/Core Specialties,
 - 52.6% worked in Family Medicine
 - 25.3% worked in Internal Medicine
 - 7.0% worked in Pediatrics
 - 8.5% worked in OB/GYN
 - 6.6% worked in General Surgery

- ◆ 70.3 % of physician assistants worked in specialized categories, with the largest category being anesthesiology

Executive Summary (continued)

Physician and physician assistant workforce demographics are important to note as research has concluded that demographics play an important role in geographical distribution and hours worked per week.

In 2010/2011:

- ◆ Race/Ethnicity
 - 70.6% of the physician workforce was white. The physician workforce has become more racially diverse. In 1992, 86.5% of Georgia’s physicians were white.
 - 81.4% of the physician assistant workforce was white
 - 8.8% of Georgia’s population was Hispanic. 3.8% of the physician workforce and 2.0% of the physician assistant workforce indicated they were Hispanic

- ◆ Gender
 - Only slightly more than one-fourth of the physician workforce was female (27.6%), while over one-half of the physician assistant workforce was female (56.0%)

- ◆ Age
 - Over half of the physician workforce (52.7%) was over the age of 50. In contrast, only 29.0% of the physician assistant workforce was over the age of 50

- ◆ Language
 - 9.8% of the total physician workforce indicated they spoke Spanish (the most frequently language listed, if a language other than English was given). Some other languages listed in order of highest percent spoken include: Hindi, French, German, Arabic, Urdu and Chinese

- ◆ Medicare/Medicaid
 - There was an increase in the percentage of physicians that accept Medicaid, and Medicare patients, as well as new Medicaid and new Medicare patients, in comparison to 2008

- ◆ Board Certification
 - 85.9% of physicians were board certified in their specialty, with pathologists having the highest percentage of specialty certification (96.6%) and psychiatry having the lowest (74.8%)

- ◆ Retirement
 - 10.5% of Georgia’s physician workforce and 3.0% of the physician assistant workforce indicated they plan to retire in the next five years.

Methods and Licensure Information

Physicians and physician assistants renew their Georgia license to practice medicine every two years through the GCMB. The GCMB licenses both Medical Doctors (MD) and Doctors of Osteopathy (DO). All physician and physician assistant licenses expire biennially at the end of the licensees' birth month.

The surveys were conducted as part of the online or paper renewal process, depending on the licensees' preference. The majority of physicians and physician assistants renewed online. Due to the fact that the surveys are part of the renewal process, data from new licensees was not included. Data analysis was completed on all surveys. Please note that all calculations are reflective of the number of respondents who answered each question. Licensees that indicated they were not working in Georgia or retired were also excluded from the data reported here.

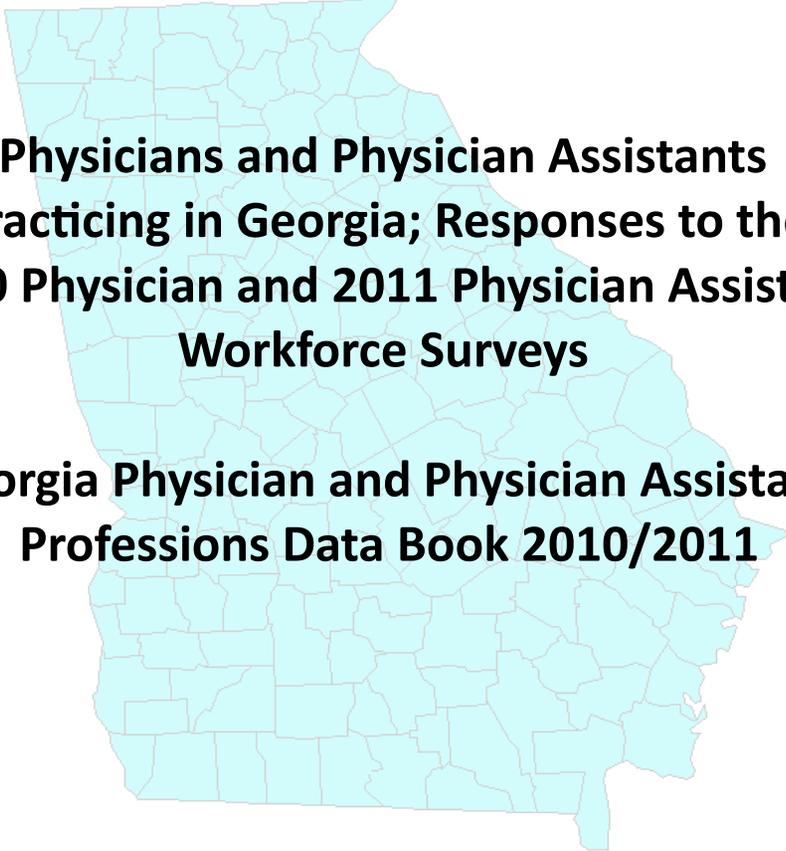

Georgia's Physician Supply; Rate* by Year

Year	Number of Physicians	Rate of Physicians per 100,000 Population	U.S. Rank ** in Year Specified

Professions Data Book 2010/2011**

Distribution of Physician Assistants in the U.S.

Georgia ranked 35th in the distribution of physician assistants per 100,000 with a rate of 23. The national rate in 2010 was 27. Georgia ranked 11th in number of physician assistants in 2010. States with the largest number of physician assistants practicing clinically included: (1) New York, (2) California, (3) Texas, (4) Pennsylvania, (5) Florida, and (6) North Carolina.

**Figure 4: Distribution of Physician Assistants, U.S. 2010
per 100,000 Population**

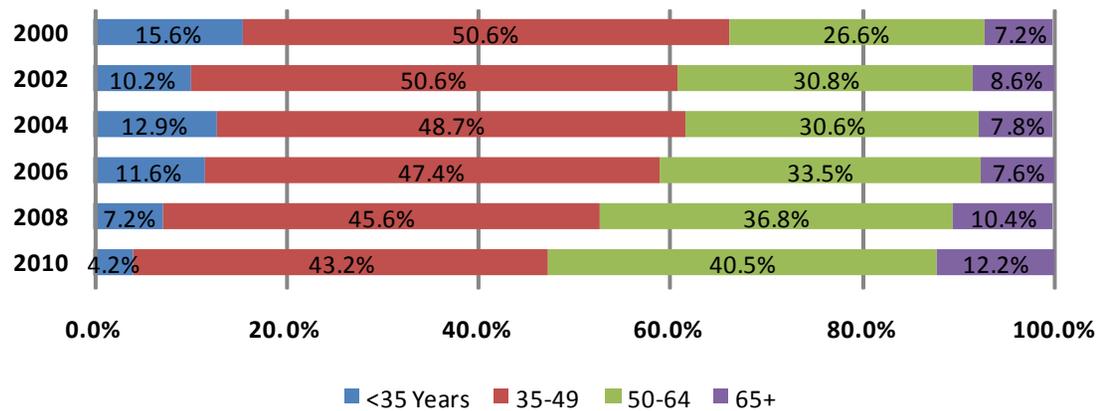

Source: American Academy of Physician Assistants (2011). *2010 AAPA Physician Assistant Census*. Rankings are quartiled. Does not include District of Columbia

Age

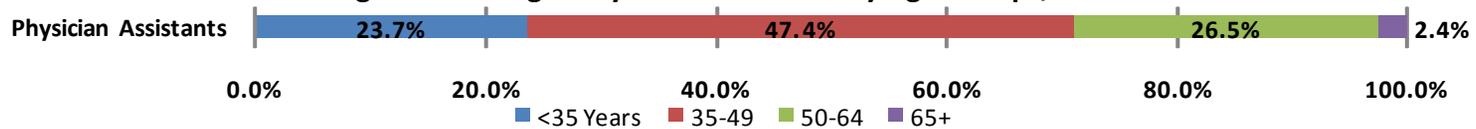

In 2010, the average age of physicians practicing in Georgia was 51 years old. 12.2% of the physician workforce was 65 years or older. In 2000, 7.2% of the workforce was over 65. The 50 years and older age group has steadily increased since 2004.

Figure 5: Georgia Physician Workforce by Age Groups, 2010

In 2011, the average age of physician assistants practicing in Georgia was 43 years. 2.4% of the physician assistant workforce is 65 or older.

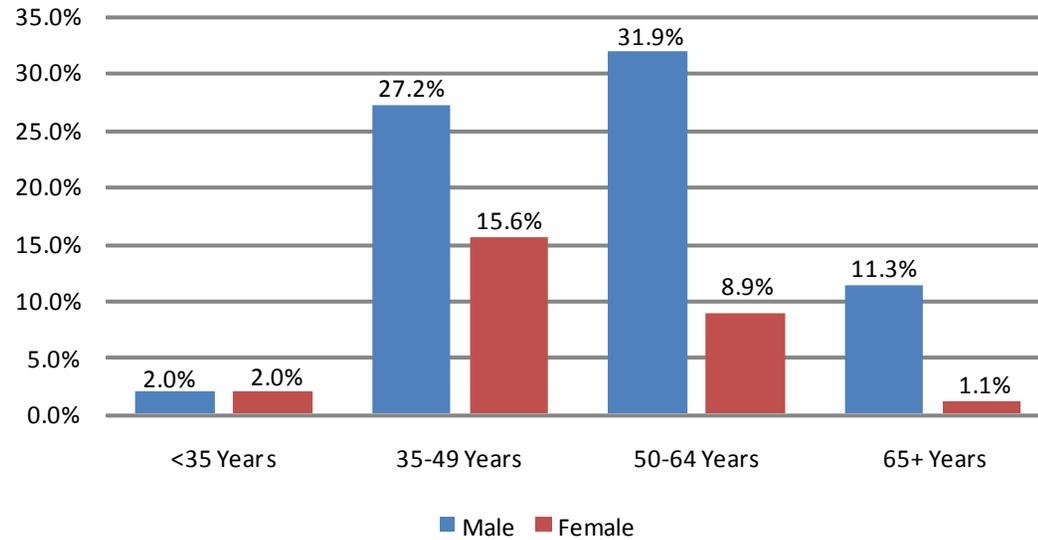

Figure 6: Georgia Physician Assistants by Age Groups, 2011

Gender

In 2010, 72.4% of Georgia physicians were male and 27.6% were female. Nationally, 30.1% of the physician workforce was female. The 2010 GBPW survey showed that the percentage of males was higher in each age group, except for under 35 years old, where the percentage was equal. In the U.S., the percent of female physicians was larger in all age groups less than 55 years of age. Although the percentage of female physicians has been increasing since 2006, Georgia was still very much dominated by male physicians.

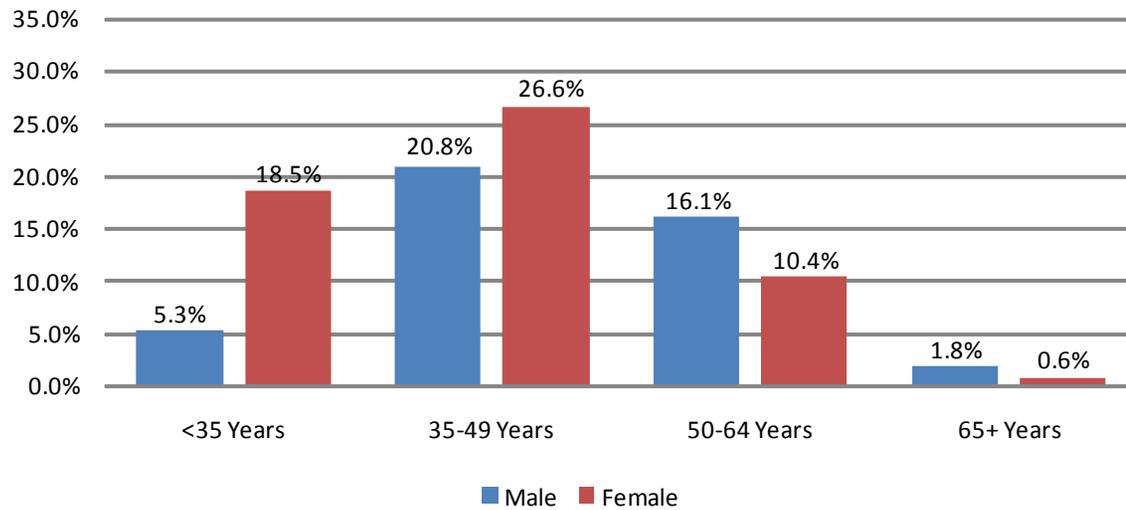

Figure 7: Georgia Physicians by Age and Gender, 2010

Gender, continued

In 2011, 56.1% of the physician assistants practicing in Georgia were female and 44.0% were male*. There was a greater percentage of female physician assistants in the age groups 49 years old and younger. 63.4% of the 49 years and younger age group was female. Of the physician assistants age 50 and above, 62.0% were male and 38.0% were female.

Figure 8: Georgia Physician Assistants by Age and Gender, 2011

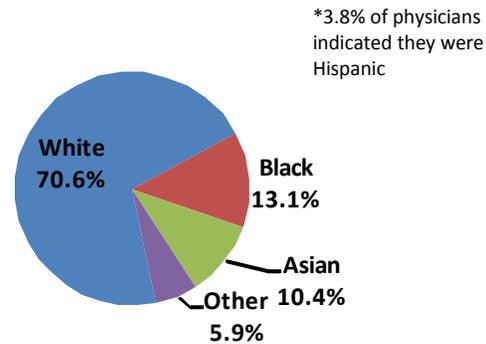

*Total is slightly over 100.0% due to rounding

Race and Ethnicity

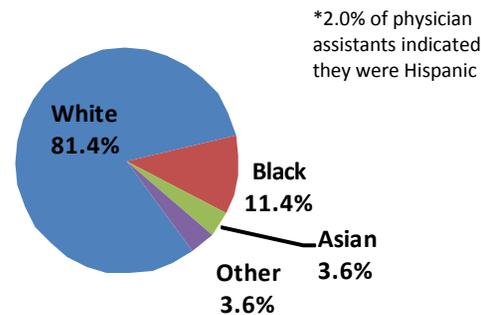

Of the physicians practicing in Georgia, 70.6% were white, followed by 13.1% who were black. In 2000, the physician workforce was 79.0% white, and 10.3% black. Additionally, 3.8% of physicians indicated they were of Hispanic ethnicity in 2010. In the 2010 Census, 8.8% of Georgia’s population was Hispanic (a 96.1% increase from the 2000 Census).

Figure 9: Georgia Physicians by Race and Ethnicity*, 2010

In 2011, 81.4% of Georgia’s physician assistant workforce was white, and 11.4% were black. Additionally, 2.0% indicated they was of Hispanic ethnicity.

** All Physicians

Physicians Accepting Medicaid Patients

The percentage of physicians that accept Medicaid patients had been declining since 2004, but experienced a modest increase in 2010. In 2010, 74.1% of Georgia's physician workforce indicated they accepted Medicaid patients. In 2006, a question asking if they were accepting new Medicaid patients was added to the survey.

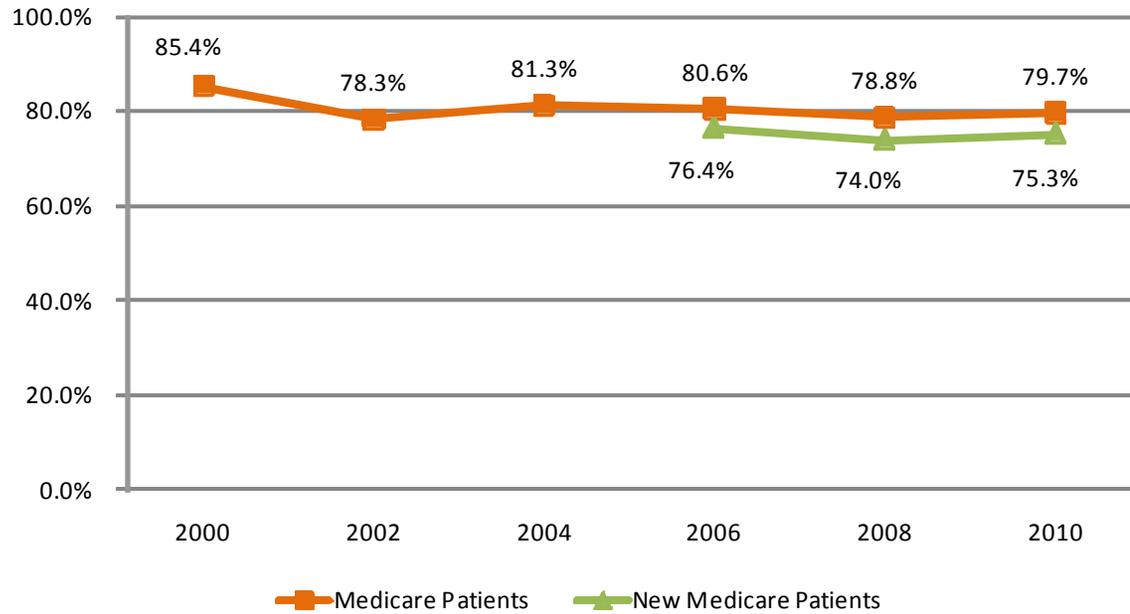

Figure 13: Georgia Physicians Accepting Medicaid Patients and New Medicaid Patients, 2010

Physicians Accepting Medicare Patients

The percentage of physicians that accept Medicare patients had been declining since 2004, but experienced a modest increase in 2010. In 2010, 79.7% of Georgia's physician workforce indicated they accepted Medicare patients. In 2006, a question asking if they were accepting new Medicare patients was added to the survey.

Figure 14: Georgia Physicians Accepting Medicare Patients and New Medicare Patients, 2010

Board Certification

In 2010, 85.9% of Georgia’s physicians were board certified in their specialty. Table 2 shows the specialties with the highest and lowest levels of board certification. Nationally, 69.6% were board certified in their specialty, and 74.7% were board certified by at least one board.

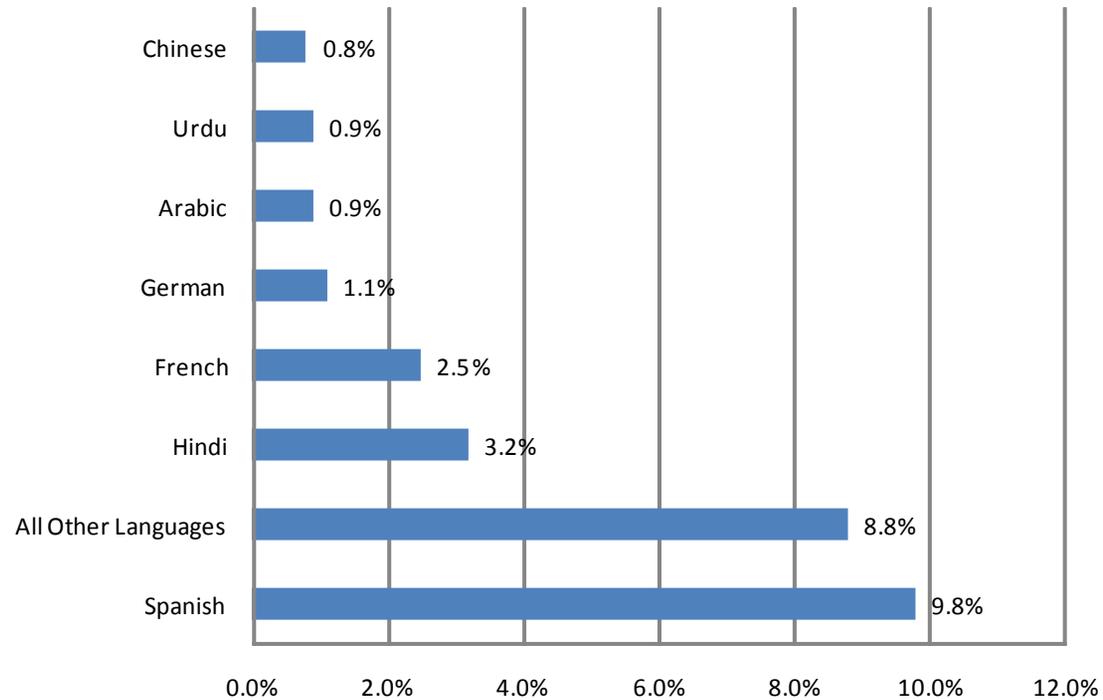

Table 2: Five Highest and Lowest Rates of Board Certification by Physician Specialty, 2010

Highest		Lowest	
Pathology	96.6%	Psychiatry	74.8%
Otolaryngology	94.8%	Family Medicine	78.1%
Radiology	93.8%	Emergency Medicine	78.3%
Oncology	93.3%	Rheumatology	82.0%
Dermatology	93.2%	Pain Medicine	84.0%

Physicians that Spoke a Language Other than English

In 2010, 28.0% of Georgia’s physicians indicated they spoke a language other than English, and 6.8% said they spoke two or more languages. Over 100 different languages were listed. Of the 19,830 physicians practicing in Georgia, 9.8% of them responded that they speak Spanish (the most frequently occurring language listed). Primary Care/Core Specialties physicians that said they spoke Spanish were practicing in 111 different counties, and overall, Spanish speaking physicians from all specialties were practicing in 120 counties.

Figure 15: Languages Other than English, Spoken by Georgia Physicians, 2010

Appendix II:

**Georgia Physician and Physician Assistant
Professions Data Book 2010/2011**

Definitions

Metropolitan Statistical Area (MSA)-a statistical standard developed by the Federal Office of Management and Budget. Must contain either a place with a minimum population of 50,000 or a Census Bureau-defined urbanized area and a total population of at least 100,000. The 100,000 total requirement applies to the one or more counties which may comprise the metro area in question.

Source: US Census Bureau, <http://www.census.gov/population/metro/>

Physician and Physician Assistant Specialties-Physician and physician assistant specialties are self-determined. "Other" is a choice given if the physician or physician assistant does not feel as if the listed specialties apply to him or her.

Physicians for Rural Areas Assistance (PRAA)-Counties eligible for the Georgia Board for Physician Workforce's Scholarship and Loan Repayment Programs. Counties under 35,000 population are eligible, and the 2010 Census population determines the current eligibility.

Source: O.C.G.A.: 31-34 (1-9)

Primary Care/ Core Specialties-Specialties defined by the Georgia Board for Physician Workforce as: Family Medicine, Internal Medicine, Pediatrics, OB/GYN, General Surgery, and Emergency Medicine*.

Source: Rules and Regulations of the State of Georgia 195-6-.01 (8)

*Emergency Medicine was not defined as a Primary Care/Core Specialty by GBPW until FY 2013. Therefore, it is not recognized as such in this survey

Primary Care Service Area (PCSA)-Designation developed for the Georgia Board for Physician Workforce, and was determined by examining health care utilization patterns of the citizens of individual counties. Ninety-six (96) areas were designated by applying two criteria to a review of data in the Georgia Hospital Questionnaire: (1) A PCSA was designated if at least 30% of the patients received care in their county of residence or (2) If a county received less than 30% of its residents as patients, it was assigned to the county where the majority of its residents go for primary care.

Population-Population data used from 2010 Census Bureau and 2011 Census Bureau estimates.

Source: Governor's Office of Planning and Budget, <http://opb.georgia.gov/census-data> ; US Census Bureau, <http://www.census.gov/2010census/popmap/ipmtext.php?fl=13>

Secondary Care Service Area (SCSA)-Designation developed for the Georgia Board for Physician Workforce and based on the twelve (12) areas defined by the General Assembly. These areas are utilized as areas for secondary care specialties (ie. specialties not considered primary care/core). Regions were evaluated by variables such as socio-economic status, health status, and population over 65.
