INTRODUCTION

This report of the Georgia Board for Physician Workforce (GBPW) is the result of the 15th annual survey of physicians graduating from Georgia's Graduate Medical Education (GME) Programs. The purpose of this survey is two-fold: to inform the medical education community and state physician workforce planners about the experiences of graduates, and enlighten state physician workforce planners about the supply and demand for new physicians in Georgia. The survey offers insight into residents' demographic characteristics, compensation levels, retention rates, practice plans, assessment of job market, and training information.

METHODOLOGY

In 2016, 593 (**82.8%)** of Georgia GME graduates completed the GME Exit Survey. Surveys were given to each of Georgia's residency programs for distribution to their GME graduates. Once surveys were completed, each of the residency programs collected the surveys and returned the surveys to GBPW.

The response rate varies throughout this publication, as noted by the totals included in each chart or table. Calculations are reflective of the number of graduates who answered each question. Some calculations may not equal one hundred percent exactly due to rounding. All Georgia GME programs with graduates participated in the survey. They are as follows:

Emory University School of Medicine Floyd Medical Center Houston Healthcare Mayo Clinic Health System in Waycross Medical College of Georgia at Augusta University Memorial Health University Medical Center Midtown Medical Center, Columbus Regional Health Morehouse School of Medicine Navicent Health (formerly Medical Center of Central Georgia) Phoebe Putney Memorial Hospital Wellstar Atlanta Medical Center

KEY FINDINGS FROM THE 2016 SURVEY

DEMOGRAPHICS

- 59.2% of respondents are male, up 3% from 2015
- 68.1% of respondents are native born U.S. citizens
- Age range, indicated by respondents, was 25 to 57 years of age; with the mode being 31
- The largest racial identity group of respondents was Caucasian (52.5%), followed by Asian/Pacific Islander (23.8%)
- Nearly all respondents (94.9%) identified as non-Hispanic

GEOGRAPHY

- 23.7% of respondents graduated from a high school located in Georgia
- Of the respondents going into patient care, 42.1% indicated they will be practicing in Georgia after their current training; while 56.7% will be practicing in another state
- Of those respondents that graduated from high school in Georgia, 15.1% graduated from an international medical school, compared to 17.9% in 2015

MEDICAL SCHOOL

- 91.2% of respondents attended an allopathic school compared to 84.5% in 2015
- 24.7% of respondents attended medical school in Georgia, while 46.7% of respondents attended medical school in another state
- 28.6% of respondents attended medical school in another country

DEBT AND SALARY

- 64.0% of the respondents had debt over \$200,000
- 49.4% of respondents indicate a starting salary of \$200,000 or less
- Respondents with confirmed practice plans averaged a rating of 6.0 for satisfaction with their compensation on a scale of 1 to 10, with 10 being completely satisfied

RETENTION

- 37.7% of respondents that graduated from both high school and a GME program in Georgia, plan to remain to practice
- 26.3% of respondents going for additional training/fellowship plan to return to Georgia to practice and 56.0% are uncertain
- 21.5% of respondents who are entering patient care, report 'Proximity to Family' as their biggest reason for leaving Georgia upon graduation.

PRACTICE OPPORTUNITIES

- 38.8% of respondents indicated plans to work in small city, suburban or rural area
- 35.0% indicate they will be practicing in a group practice as an employee
- GME graduates were also asked to provide an overall assessment of national practice opportunities in their specialty. Using the same scale where one indicates very few jobs and ten indicates many jobs, the average among respondents was **8.3**

SATISFACTION WITH TRAINING

Using a rating scale of where one indicates strongly disagree to ten indicates strongly agree)

- GME graduates were asked if they were satisfied overall with the training they received, average rating among respondents was **9.2**.
- GME graduates were also asked if they would choose to train again at the same site, the average rating among respondents was **9.0**.
