

GEORGIA PHYSICIAN WORKFORCE

Based on 2014 – 2015 Licensure Renewal Data

Primary Care/Core Specialties

GEORGIA BOARD FOR PHYSICIAN WORKFORCE

State of Georgia

Published July 2017

ACKNOWLEDGEMENTS

- The report was produced under the direction of LaSharn Hughes, Executive Director, Andrea Pass, Data Analyst, Tommy Kelly, IT Support Specialist, Consultant G.E. Alan Dever, MD PhD and Audra Cochran, MD, Medical Intern.
- The Board would like to thank the Georgia Composite Medical Board for providing physician licensure renewal data.
- This document is provided to the Chairperson Mark G. Hanly, MD and the Georgia Board members on behalf of Executive Director LaSharn Hughes.

EXECUTIVE SUMMARY

This is the 31st year the Georgia Board for Physician Workforce has examined physician supply and demand. The purpose of this document is to measure and track trends in physician characteristics, supply and distribution utilizing data reported from the license renewal process from January 1, 2014 – December 31, 2015. The physician data is compiled, validated and analyzed by the Georgia Board for Physicians Workforce staff and presented on the state, county and Primary Care Service Area (PCSA) level. The document highlights trends in physician workforce patterns such as:

- Physician demographics by specialty, age, gender and race.
- The total number of physicians and rate per 100,000 Georgia population.
- Rate and rank by county, Primary Care Service Areas (PCSAs) and Metropolitan Statistical Areas (MSAs).

There were 30,592 physician renewals and 9,175 were excluded from the dataset if the physician was one of the following:

- Retired or practicing out of the state.

This document provides physician data for 21,417 physicians who are licensed and actively practicing in the state of Georgia.

- There were 209.7 physicians per 100,000 population who were actively practicing in the state of Georgia, compared to the national average of *265.5 physicians per 100,000.

Physician Workforce

- In the year 2000 Georgia's population was 8,227,303 in 2015 it was 10,214,860, an increase of 24.2%.
- The rate of physicians increased by 9.4% from 2000 – 2015.
- Collectively primary care/core specialties showed an increase in actively practicing physicians from 2008 - 2015.
- In 2015 there were more physicians practicing in Metropolitan Statistical Areas (MSAs) than in Non-Metropolitan Statistical Areas (Non-MSAs) for all primary care/core specialties except for family medicine.
- 51% of all physicians practicing in Georgia are in the top 10 ranked PCSAs. This represent 29% of Georgia's population.

Demographics

- The percentage of white physicians has declined by 11.2% from 2006 – 2015, black physicians increased by 10.4%.
- The physician workforce is aging, 53.4% of the physician population is age 50 and above, compared to 2000 when 33.8% of the physician workforce was age 50 and above.
- Although males dominate most of the physician workforce in Georgia, the number of male physicians declined by 7.3% from 2006 – 2015.
- Female physicians has increased each year since 2006, females make up 31.3% of the physician's workforce in Georgia, which is close to the national average of *32%.
- The percent of physicians accepting Medicare and Medicaid patients and new Medicare and new Medicaid patients have progressively increased from 2006 – 2015.
- Physicians accepting Medicare patients represent 83.9% of the physician population and physicians accepting Medicaid patients represent 79.9% of the physician population.
- The internal medicine specialty had the highest percentage of physicians at 14.3%, family medicine represent 13.4% and emergency medicine make up 8.1%.
- Females represent 61% of the pediatric specialty, this is the only specialty in which females dominate by over 50%.
- Male physicians represent 88% of the general surgery specialty, and over 50% of the specialty workforce for family medicine and internal medicine.

Distribution of Physicians by PCSAs and Counties with no Physicians 2015

METHODOLOGY

The survey consists of a two-year renewal cycle for physicians by the Georgia Composite Medical Board. The survey is not mandatory to renew the license and some physicians chose to opt out of the survey. After obtaining the data from the medical board, the GBPW staff compiles, validates and analyzes the data from the surveys to report on physician characteristics, supply and demand.

The raw dataset contains all licensed physicians that renewed in the state of Georgia within a two year reporting period.

Data Set Exclusions:

- Retired physicians
- Physicians licensed but not practicing in Georgia.

Data Set Inclusions:

- Practicing physicians in the State of Georgia (21,417).

Count of Total Physicians

The count of total physician's methodology was used to determine how many unique physicians are practicing in the state of Georgia.

One (1) License Number = One (1) Physician

Method:

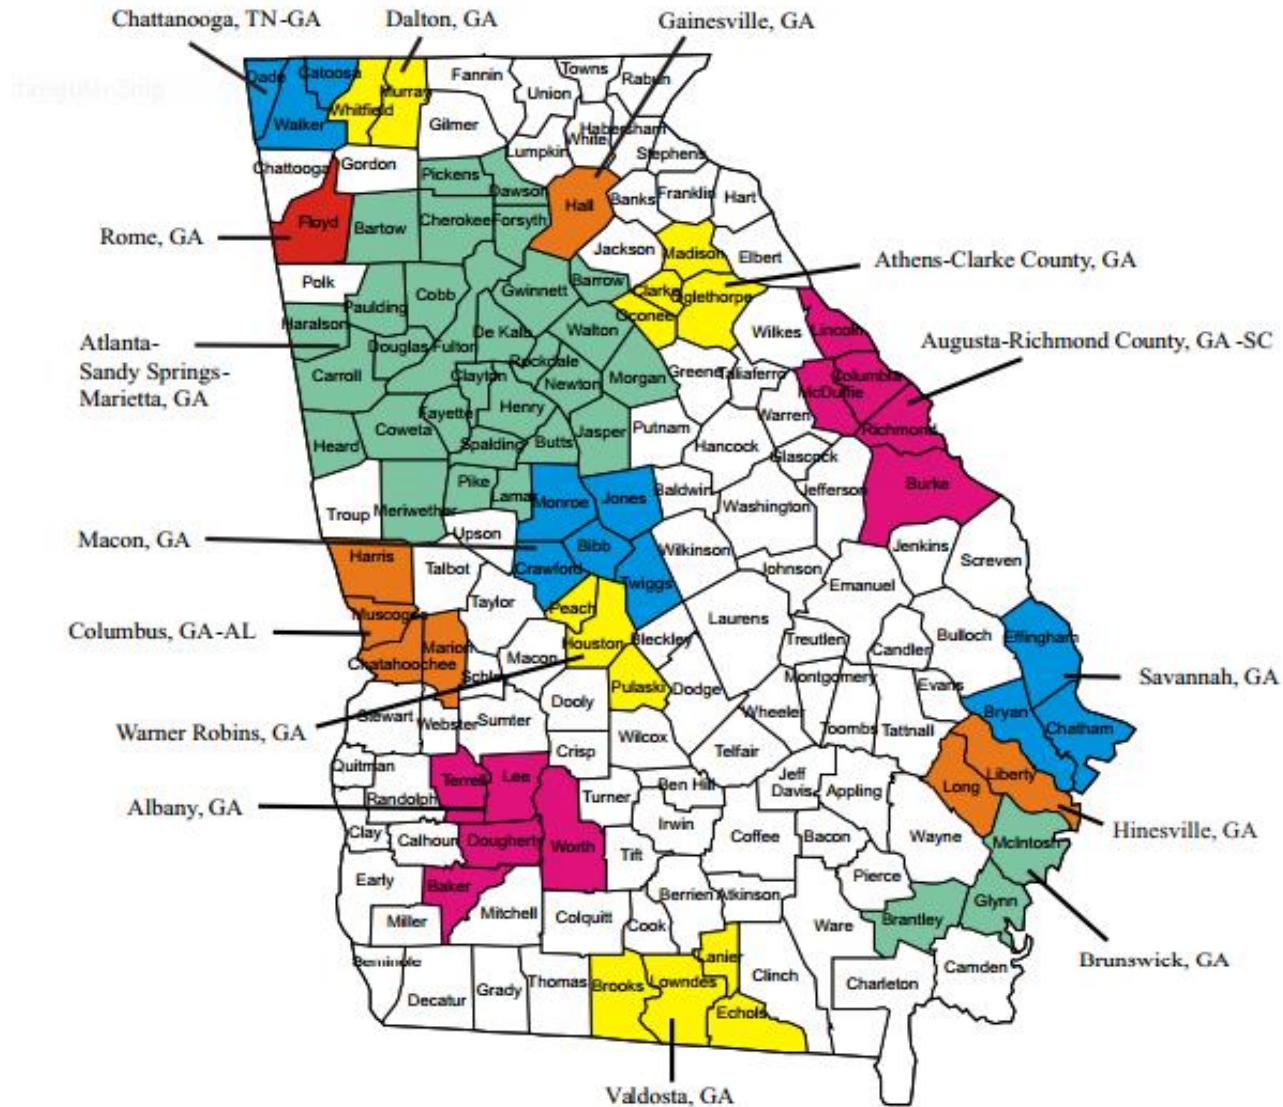

If a physician reported that he/she worked in a primary county then he/she was counted as one (1) physician in that county.

If a physician reported that he/she worked in one of the secondary counties but did not work in one of the primary counties he/she was counted as one (1) physician practicing in the secondary county.

The distribution of physicians per 100,000 population was then calculated by County and by Primary Care Service Areas (PCSAs). Basic demographic statistics were also calculated.

Georgia Metropolitan Statistical Areas (MSAs) and Non-Metropolitan Statistical Areas (Non-MSAs)

Map1

In the United States, a geographical area with relatively high population density at its core and close economic ties through the area is called a Metropolitan Statistical Area (MSA).

Transversely, an area with low population density and little economic ties to surrounding areas is called a Non-Metropolitan Statistical Area (Non-MSA).

All MSAs are in color, the color is null for Non-MSAs.

Map provided by Policom Corporation Economic Analysis Everyone Understand.

Table 2 Distribution of Physicians by MSA and Non-MSA, Georgia 2015

Total Physicians by MSA and Non-MSA			
	Number Total Physicians	Population by MSA & Non-MSA	Rate per 100,000
MSA	19,143	8,279,783	231.2
Non-MSA	2,274	1,935,077	117.5

- There are 231.2 physicians per 100,000 population practicing in a MSA and 117.5 per 100,000 population practicing in a Non-MSA.

Table 3

	Distribution of Physicians by Age Group, Number and Percent								
	<=34	35 - 39	40 - 44	45 - 49	50 - 54	55 - 59	60 - 64	>=65	
MSA (Number)	1,124	2,465	2,755	2,751	2,558	2,609	2,190	2,691	
MSA Percent	5.9%	12.9%	14.4%	14.4%	13.4%	13.6%	11.4%	14.1%	
Non-MSA (Number)	98	236	243	318	297	326	336	420	
Non-MSA Percent	4.3%	10.4%	10.7%	14.0%	13.1%	14.3%	14.8%	18.5%	

MSA

- 52.5% of total physicians in MSAs are age 50 and above.
- The three largest age categories for physicians practicing in MSAs are 40 – 44 at 14.4%, 45 – 49 at 14.4%, and 65 and above at 14.1%.

Non-MSA

- 60.7% of total physicians in Non-MSAs are age 50 and above.
- The three largest age categories for physicians practicing in Non-MSAs are 65 and above at 18.5%, 60 - 64 at 14.8%, and 55 – 59 at 14.3%.

Distribution of Physicians by Race MSA and Non-MSA Georgia 2015

MSA

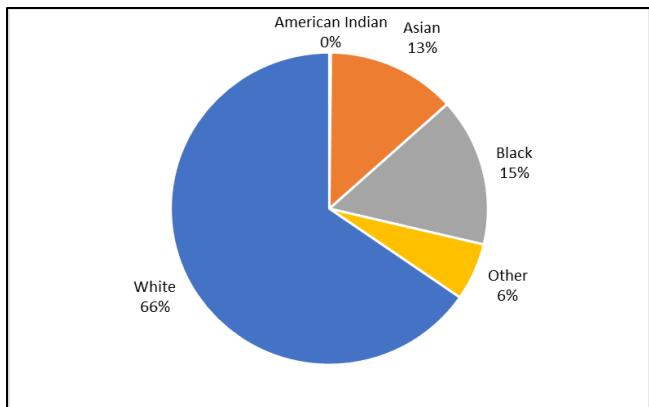

Chart 1

Non-MSA

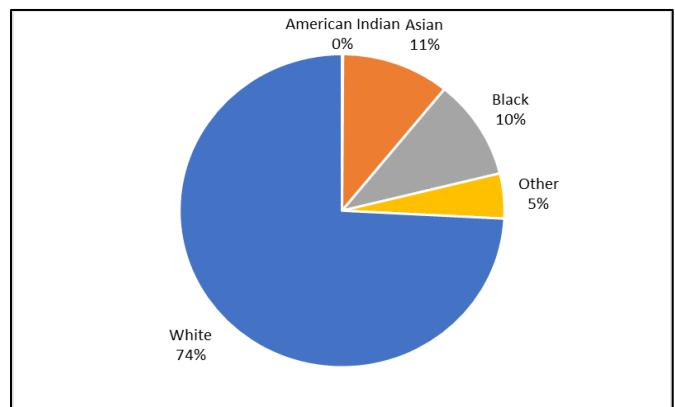

Chart 2

- There are 8% more white physicians practicing in a Non-MSA vs MSA.
- Blacks practice in MSAs at a rate 5% higher than Non-MSAs.
- The number of Asians in MSAs is 2% higher compared to Non-MSAs.

Distribution of Physicians by Gender MSA and Non-MSA Georgia 2015

MSA

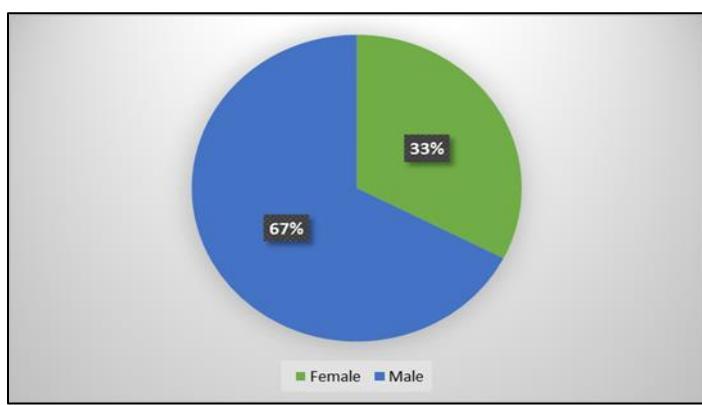

Chart 3

Non-MSA

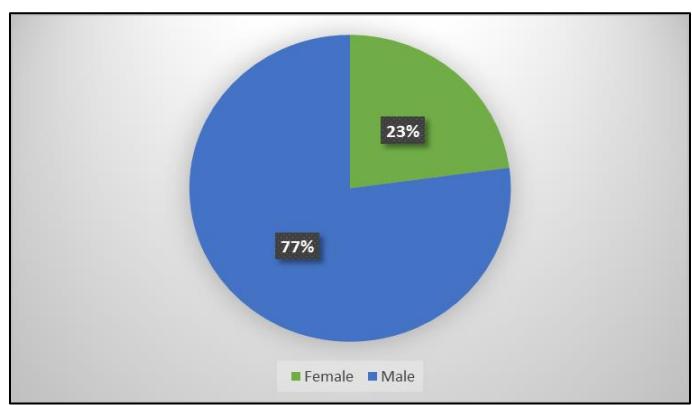

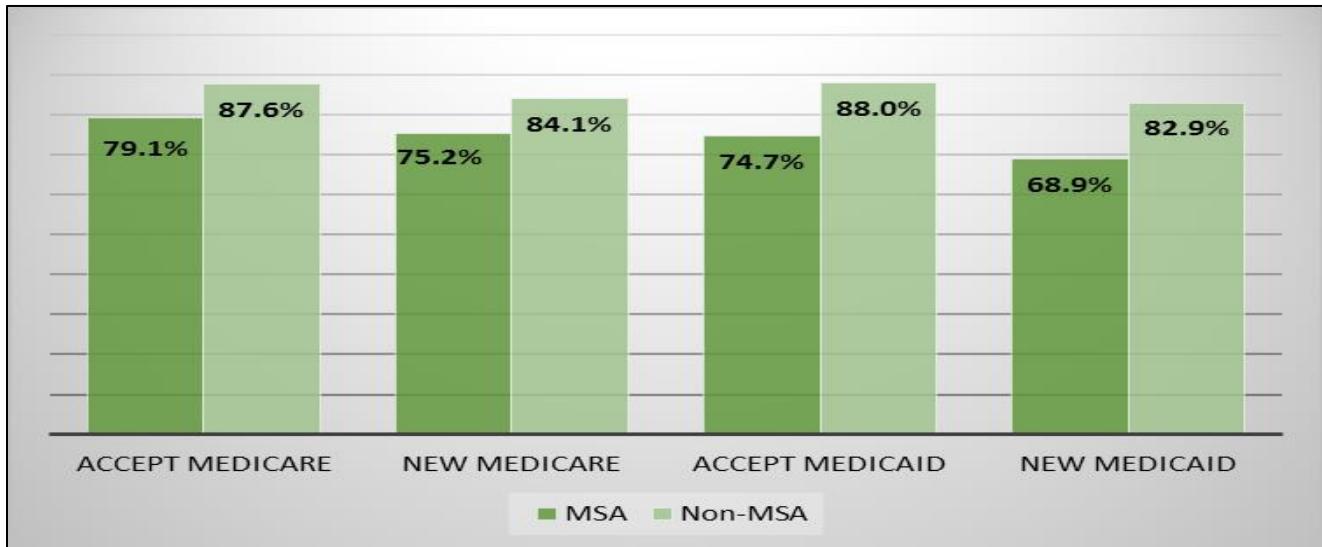

Chart 4

- There are 10% more male physicians in Non-MSAs compared to MSAs.
- The number of female physicians is 10% greater in MSAs compared to Non-MSAs.

Distribution of Physicians by Medicare and Medicaid Characteristics MSA and Non-MSA, Georgia 2015

Chart 5

There are more physicians accepting Medicare and Medicaid in Non-MSAs than MSAs.

- 79.1% of physicians accept Medicare in MSAs whereas 87.6% accept Medicare in Non-MSAs.
- 74.7% of physicians accept Medicaid in MSAs whereas 88.0 % accept Medicaid in Non-MSAs.
- There are more physicians accepting New Medicare and New Medicaid in Non-MSAs than in MSAs.

Distribution of Core Specialties by MSA/Non-MSA 2008 - 2015

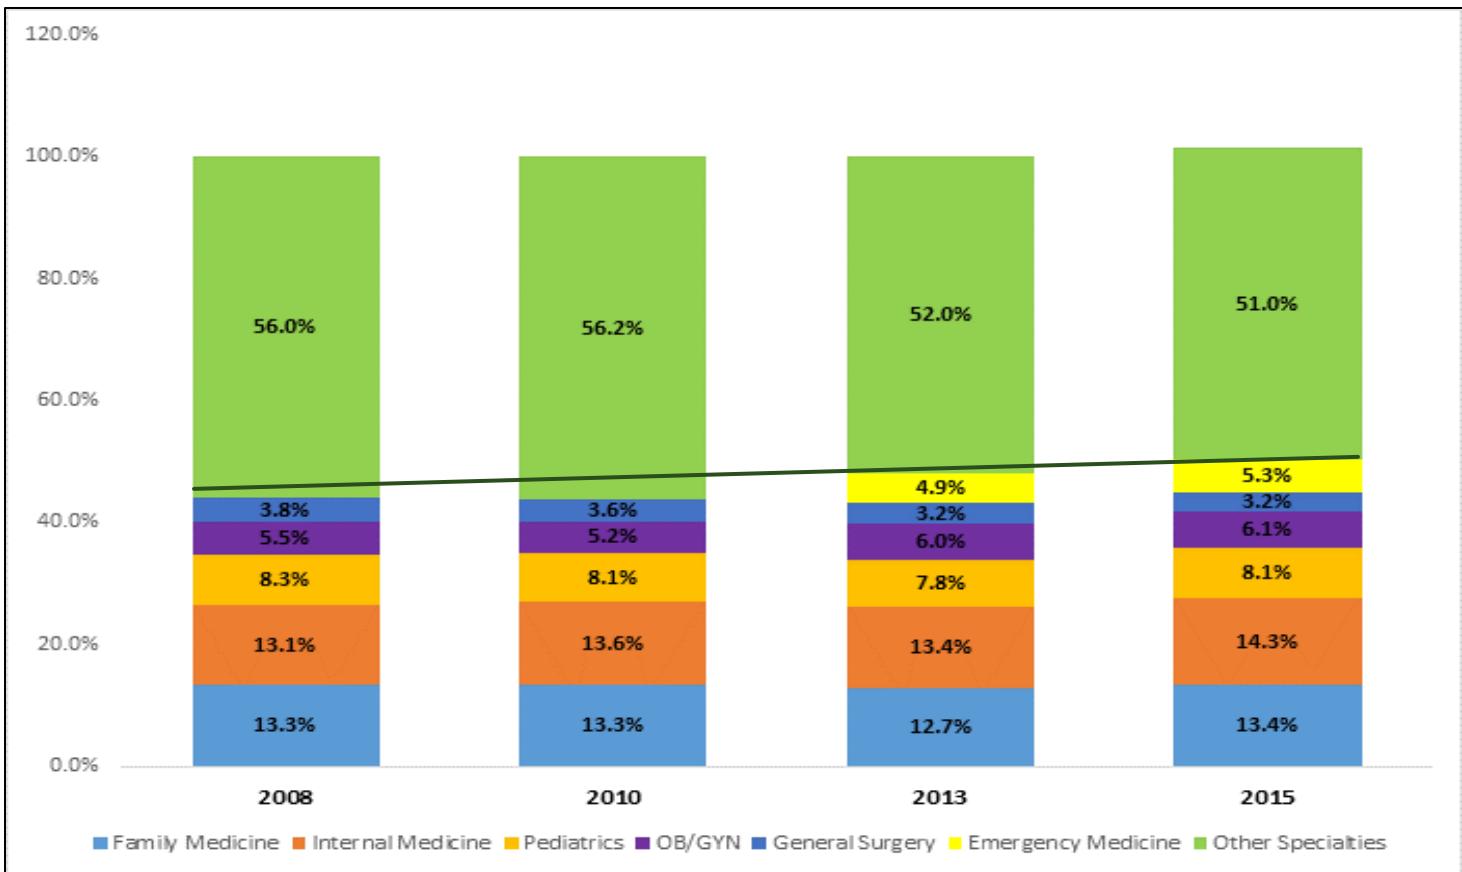

Chart 6

Specialty	2008		2010		2013		2015		2008		2010		2013		2015

Emergency medicine was added as a core specialty in 2013

Physicians Specialties in Georgia 2008 – 2015

Chart 7

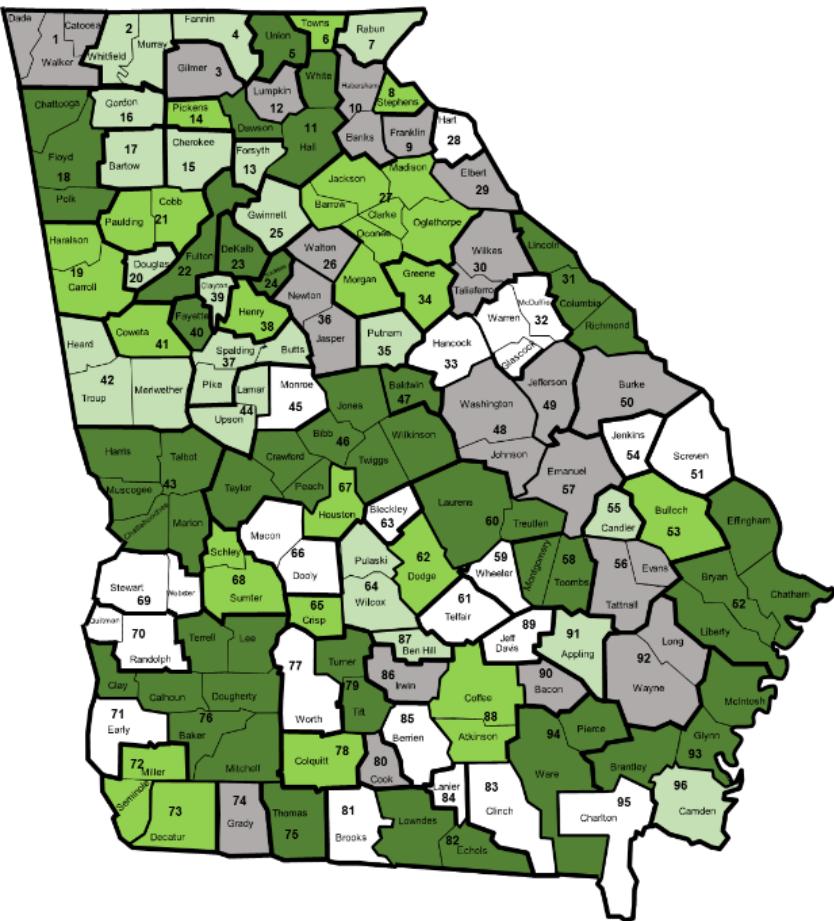

Generalist vs. Specialist

- Family medicine physicians increased 0.8% from 2008 – 2015.
- The number of OB/GYN physicians increased 10.9% from 2008 - 2015.
- General surgery decreased by 15.8% from 2008 - 2015.
- As the trend line indicates primary care/core specialties increased in 2013 because emergency medicine was added as a core specialty.

59	0	7,903	0.0	96

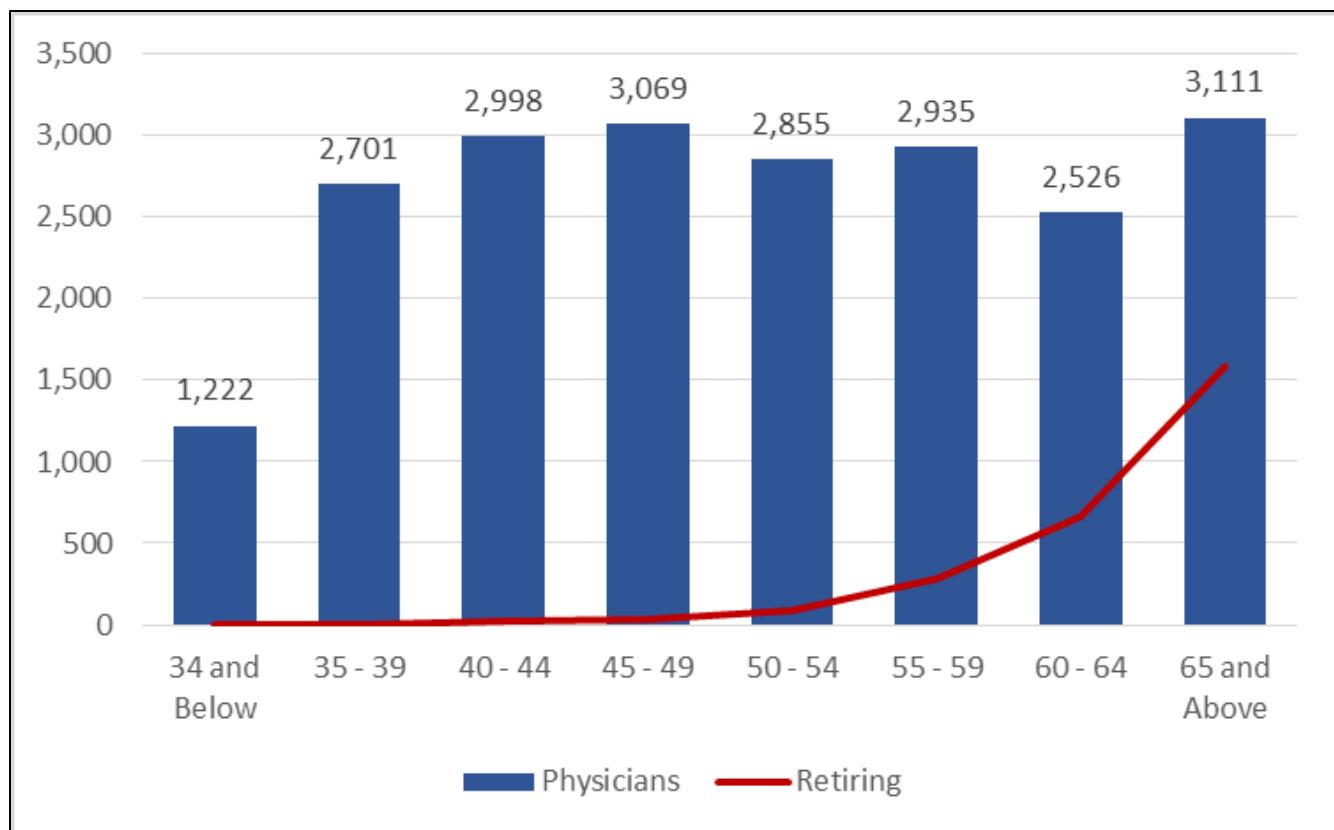

Primary Care Service Areas Definition

Georgia has 96 Primary Care Service Areas (PCSAs). PCSAs are known as self-sufficient markets of health care, they are utilized to measure primary care physician supply or geographic access to general practitioners. The Georgia Board for Physician Workforce looks at PCSAs to determine and report on the healthcare needs for the state of Georgia. This is becoming more important as reported by the Robert Graham Center that Georgia will need an additional 2,099 Primary Care Physicians by the year 2030. (<http://www.graham-center.org/content/dam/rgc/documents/maps-data-tools/state-collections/workforce-projections/Georgia.pdf>).

- Based on the renewal data the state of Georgia has 21,417 actively practicing physicians.
- The rate for total physicians is 209.7 per 100,000 population.
- There is 1 PCSA and 9 counties without physicians.
- Respectively this represents a population of 7,903 and 51,281.

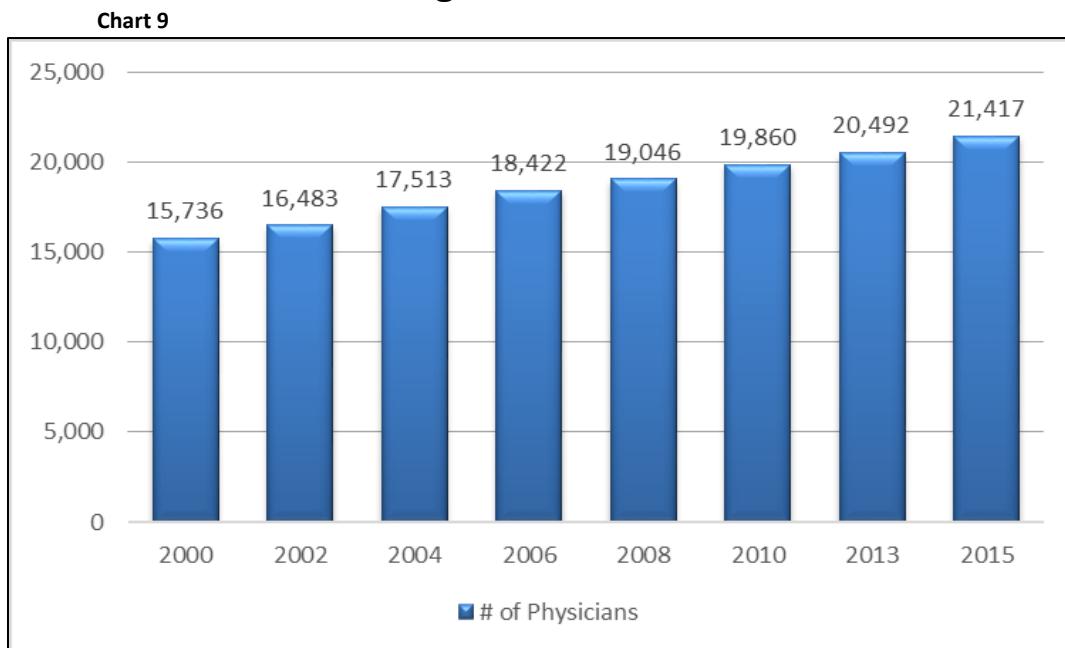

Distribution of Physicians by Age Group and % Retiring in 5 Years Georgia 2015

Chart 8

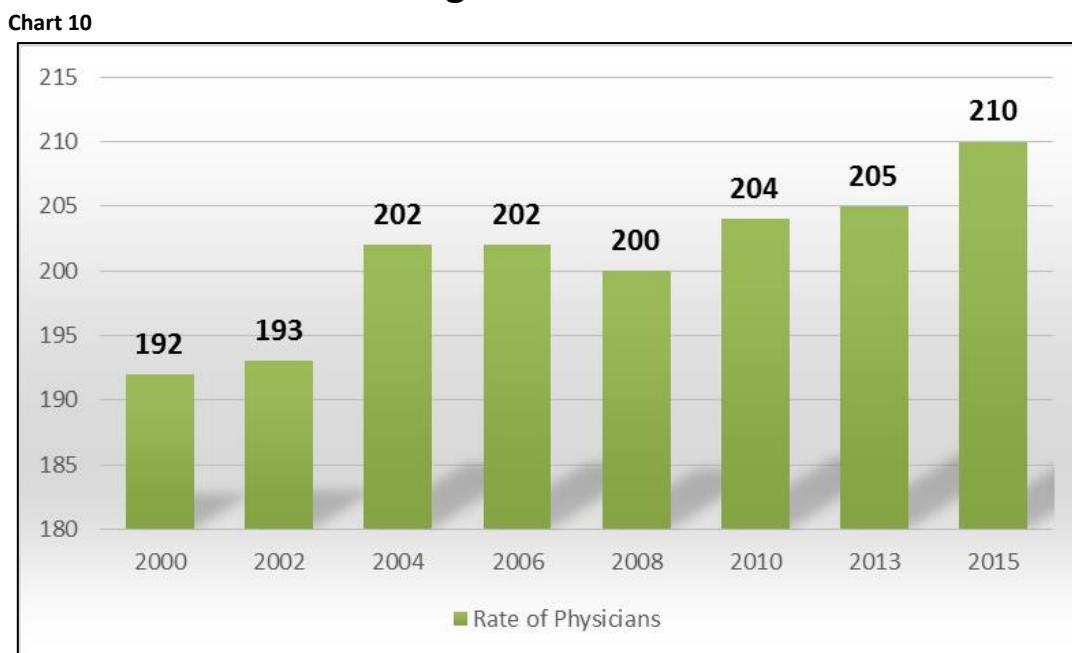

- In the state of Georgia 53.4% of the physician workforce is age 50 and above, of that percentage 23.0% reported they will be retiring in the next 5 years.
 - 11.6% of the physicians retiring in the age group of 50 and above are practicing in rural Georgia counties.
- 46.6% of the physician workforce in Georgia is age 49 and below, 0.6% reported they will be retiring in the next 5 years.
 - 4.8% of the physicians retiring in the age group of 49 and below are practicing in rural Georgia counties.

Total Number of Actively Practicing Physicians Georgia 2000 – 2015

The total number of physicians practicing in Georgia has increased by 4.5 % from 2013 - 2015.

Rate of Actively Practicing Physicians per 100,000 Population Georgia 2000 - 2015

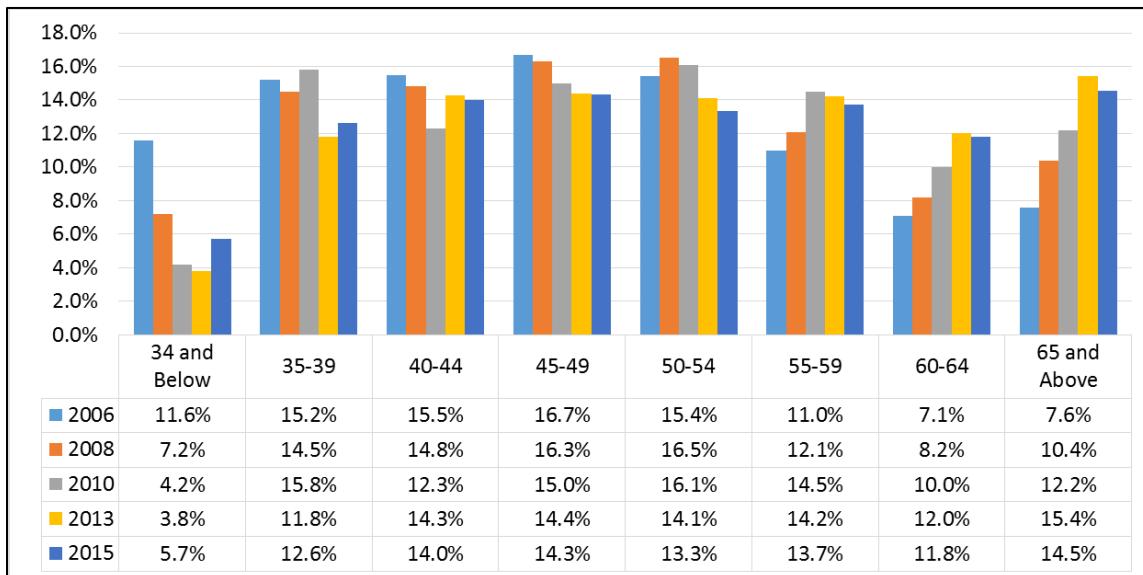

The physicians per 100,000 in Georgia increased at a rate of 2.4% from 2013 - 2015.

Distribution of Physicians by Age

Chart 11

Georgia 2006 – 2015

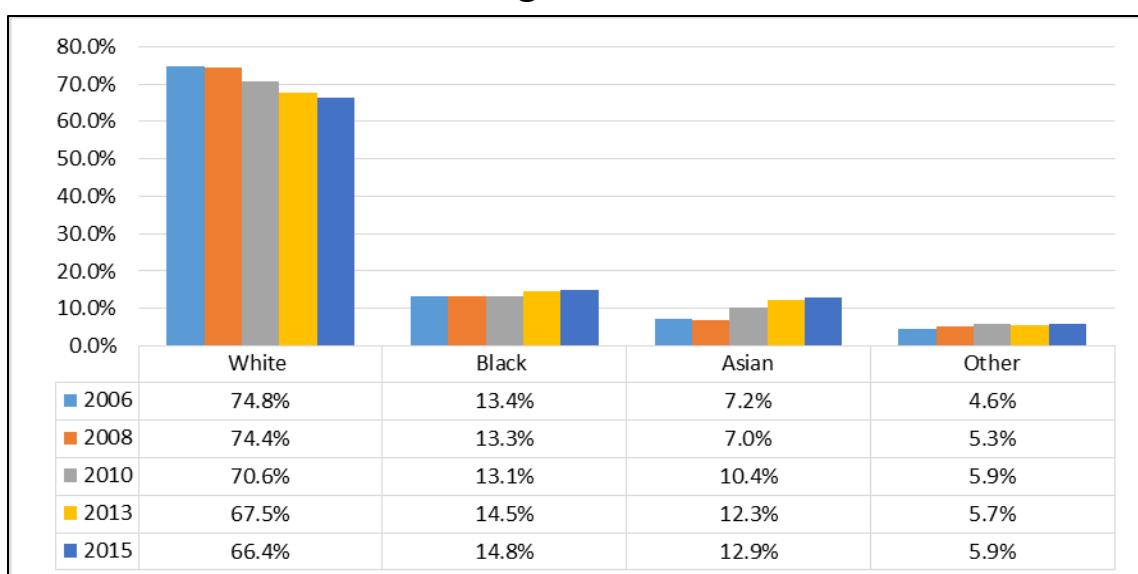

- 14.5% of physicians in Georgia are age 65 and above.
- 53.4% of the physician population is age 50 above, 28.3% is age 40 – 49 and 18.3% is Age 39 and below.

Distribution of Physicians by Race

Chart 12

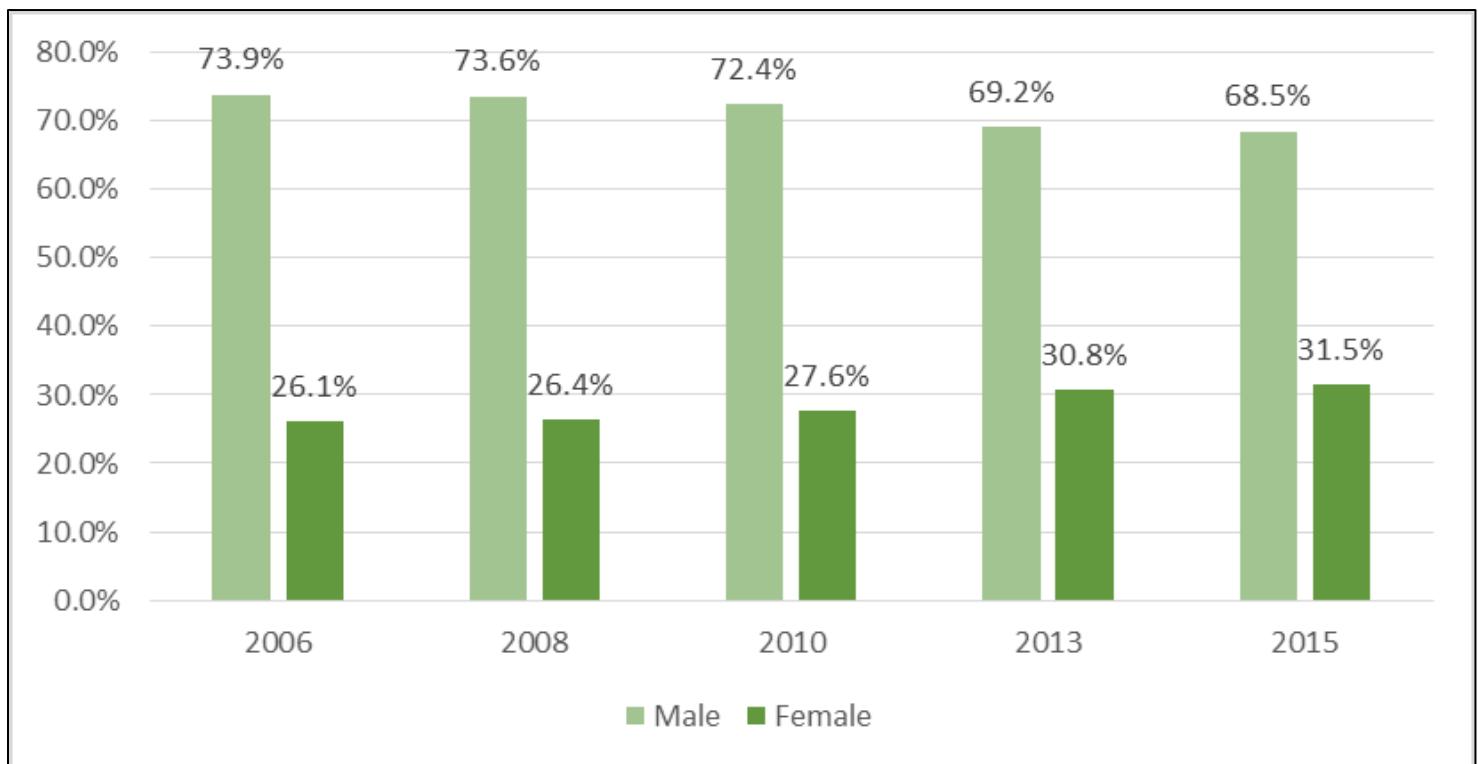

Georgia 2006 – 2015

- In the state of Georgia the number of white physicians decreased by 1.6% since 2013.
- Black physicians increased by 2.1% and Asian physicians increased by 4.9% from 2013 - 2015.

Distribution of Physicians by Gender Georgia 2006 – 2015

Chart 13

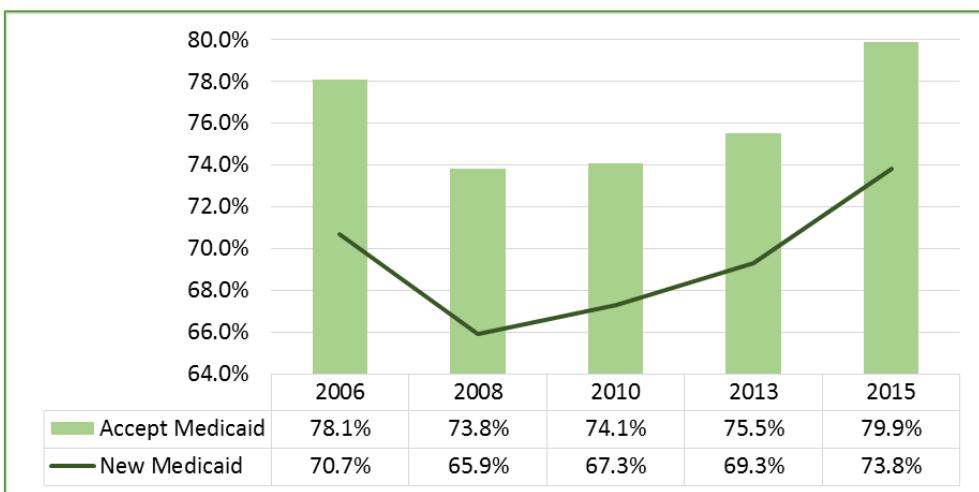

- Male physicians in the state of Georgia declined from 73.9% in 2006 to 68.5% in 2015 a decrease of 7.3%.
- The number of female physicians in the state of Georgia increased from 26.1% in 2006 to 31.5% in 2015, an increase of 20.7%.
 - Nationally females represent *32% of the U.S. physician workforce.

Internal Medicine Physicians, Rate per 100,000 Population by Primary Care Service Area (PCSA), Georgia 2015

Map 4

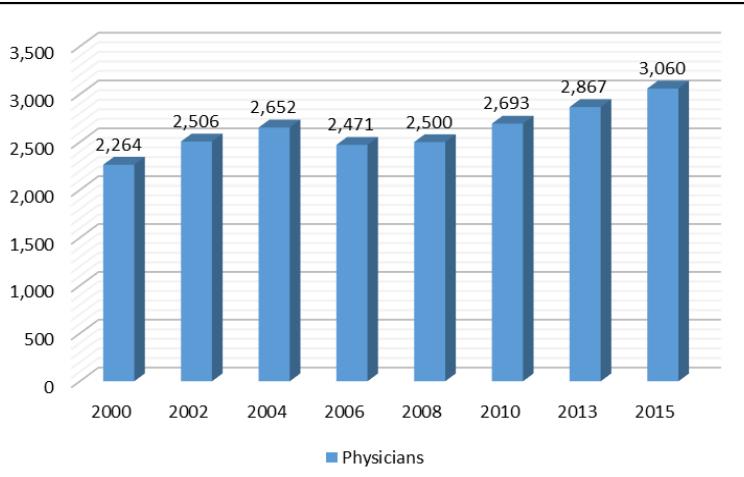

Internal Medicine Physician Profile

Georgia 2000 - 2015

Internal Medicine Physician Supply

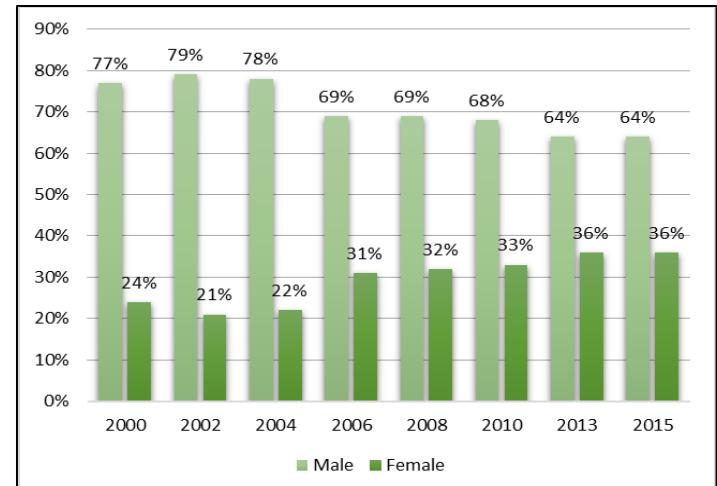

Chart 20

- Physicians practicing in the internal medicine specialty in Georgia increased by 35.2% between 2000 and 2015.

Internal Medicine Physicians by Gender

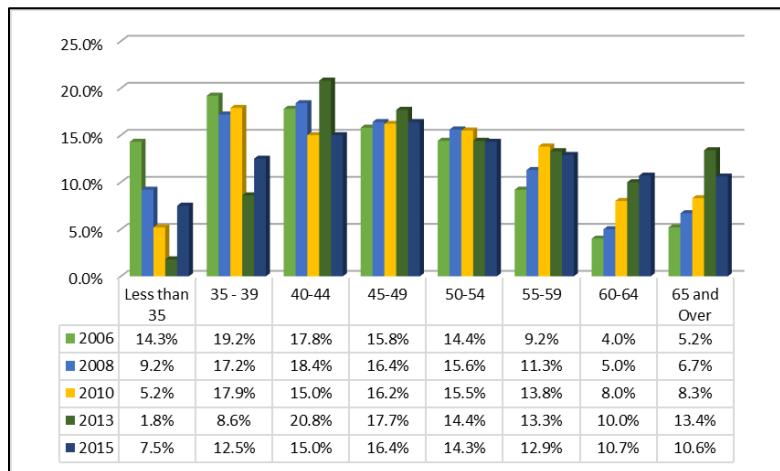

Chart 21

- Male physicians practicing internal medicine have declined by 16.8% from 2000 to 2015. Still, males represent over half of the internal medicine physician population.
- Female physicians practicing internal medicine have increased by 50% from 2000 to 2015.

Internal Medicine Physicians by Age Group

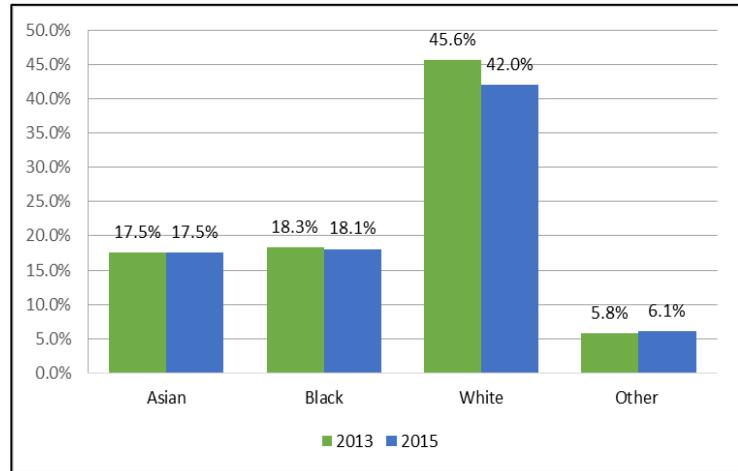

Chart 22

- Age group 45 - 49 has the highest number of physicians practicing in the internal medicine specialty at a rate of 16.4%, the 2nd highest age group is 40 - 44 at 15.0%.
- In 2015, 51.4% of all internal medicine physicians are 49 and below and 48.6% are age 50 and above.

Internal Medicine Physicians by Race

Chart 23

- Whites represent 42.0% of internal medicine physicians, but declined by 7.9% in 2015.
- Blacks represent 18.1% and have declined by 1.09% since 2013.
- Asians represent 17.5% of internal medicine physicians and with no percent change in 2015.

- The state of Georgia has 1,740 pediatric physicians.
- The rate for pediatric physicians is 17.0 per 100,000 population
- There are 21 PCAS and 64 counties without a pediatric physician.
- Respectively, this represents a population of 346,732 and 927,103.

Pediatrics Physician Profile

Georgia 2000 - 2015

Pediatric Physician Supply

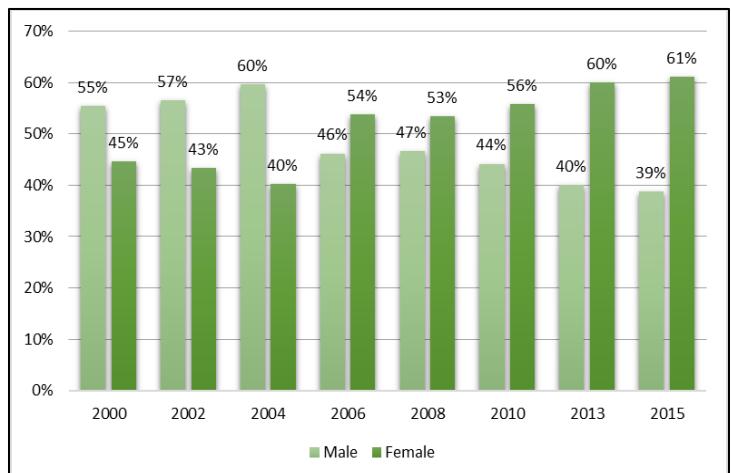

Chart 24

- Physicians practicing in the pediatric specialty increased 24.1% from 2000 to 2015

Pediatric Physicians by Gender

Chart 25

- Male physicians practicing pediatrics decline by 29.1 from 2000 to 2015.
- Female physicians practicing in the pediatric specialty have increased by 36.0% from 2000 to 2015. The pediatric specialty has the largest percentage of female physicians (61%).

Pediatric Physicians by Age Group

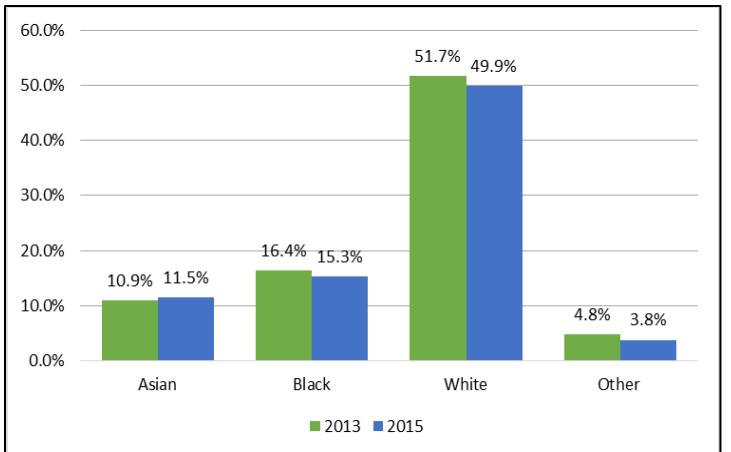

Chart 26

- Age group 40 – 44 has the highest number of physicians practicing in the pediatric specialty at a rate of 15.7%, the 2nd highest age group is 45 - 49 at 15.6%.
- In 2015, 52.6% of all pediatric physicians are 49 and below and 47.4% are age 50 and above.

Pediatric Physicians by Race

Chart 27

- Whites represent 49.9% of pediatric physicians and decreased 3.5% from 2013 - 2015.
- Blacks represent 15.3% and have declined by 6.7%.
- Asians represent 11.5% and increased by 5.5%.

- The state of Georgia has 1,314 OB/GYN physicians.
- The rate for OB/GYN physicians is 12.9 per 100,000 population.
- There are 27 PCASAs and 79 counties without an OB/GYN physician.
- Respectively, this represents a population of 428,521 and 1,261,451.

OB/GYN Physician Profile

Georgia 2000 - 2015

OB/GYN Physician Supply

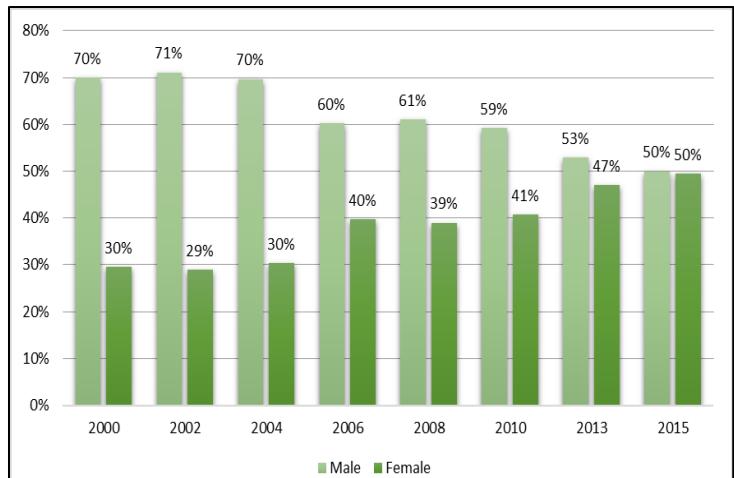

Chart 28

- Physicians practicing in the OB/GYN specialty increased 33.3% from 2000 to 2015.

OB/GYN Physicians by Gender

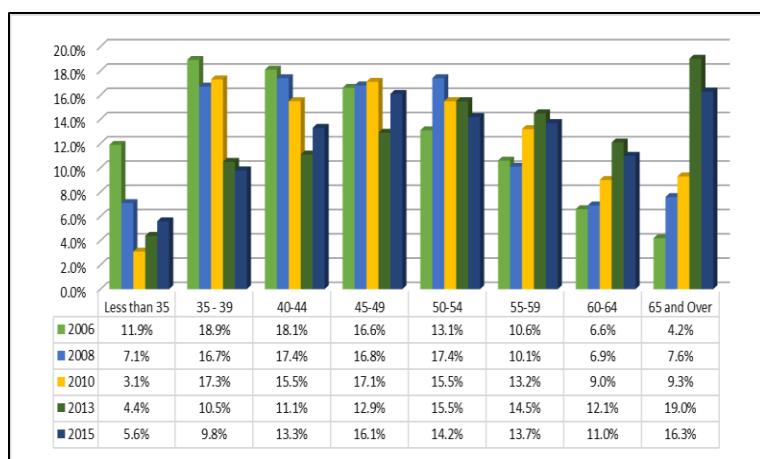

Chart 29

- Male physicians practicing in the OB/GYN specialty declined by 28.1% from 2000 to 2015.
- Female physicians practicing in the OB/GYN specialty increased by 66.7% from 2000 to 2015. The OB/GYN specialty has the second largest percentage of female physicians (50%).

OB/GYN Physicians by Age Group

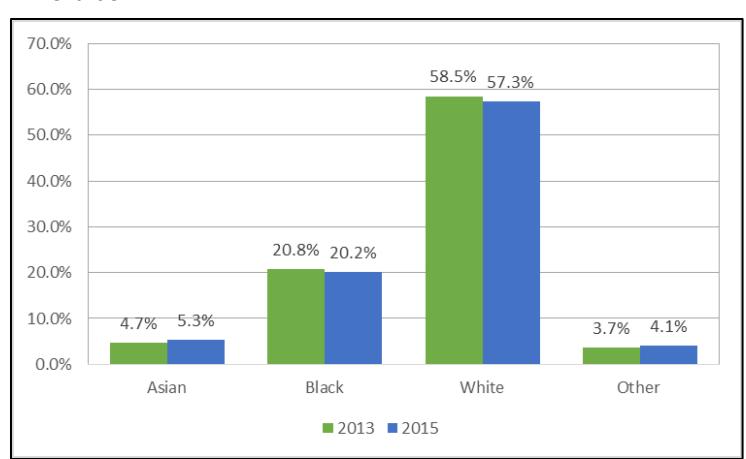

Chart 30

- Age group 65 and over has the highest number of physicians practicing in the OB/GYN specialty at a rate of 16.3%, the 2nd highest age group is 45 - 49 at 16.1%.
- In 2015, 44.8% of all OB/GYN physicians were 49 and below and 55.2 % are age 50 and above.

OB/GYN Physicians by Race

Chart 31

- Whites represent 57.3% of OB/GYN physicians, a decrease of 2.05% from 2013 – 2015.
- Blacks represent 20.2% a decrease of 2.89 from 2013 – 2015.
- Asians represent 5.3% of OB/GYN physicians and increased by 12.8% from 2013 - 2015.

10	0	62,491	0.0	76

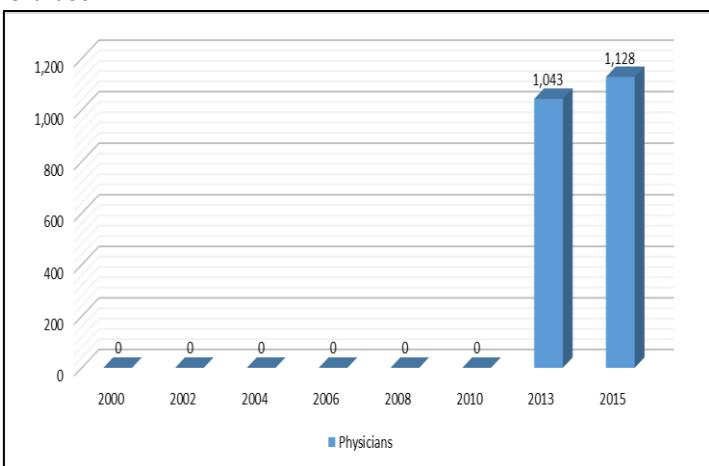

- The state of Georgia has 1,128 emergency medicine physicians.
- The rate for emergency medicine physicians is 11.0 per 100,000 population.
- There are 21 PCASAs and 63 counties without an emergency medicine physician.
- Respectively, this represents a population of 405,116 and 952,587.

Emergency Medicine Physician Profile

Georgia 2000 - 2015

Emergency Medicine Physician Supply

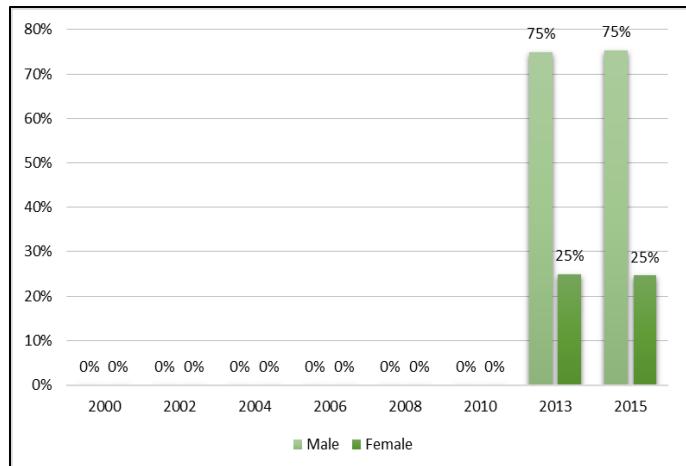

Chart 36

- Physicians practicing in the emergency medicine specialty increased by 8.1%.
- Emergency medicine was not considered a core specialty from 2000 – 2010.

Emergency Medicine Physicians by Gender

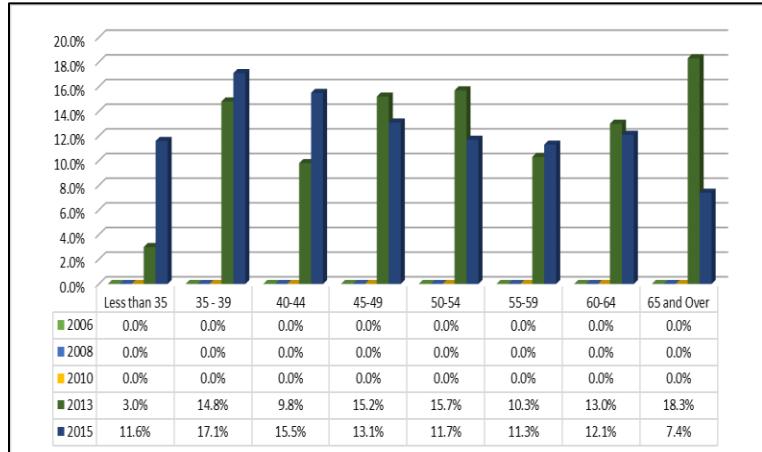

Chart 37

- Male and female emergency medicine physicians showed no growth from 2013 – 2015, they remained constant.
- Males represented 75% of the emergency medicine specialty and females represented 25% of the emergency medicine specialty.

Emergency Medicine Physicians by Age Group

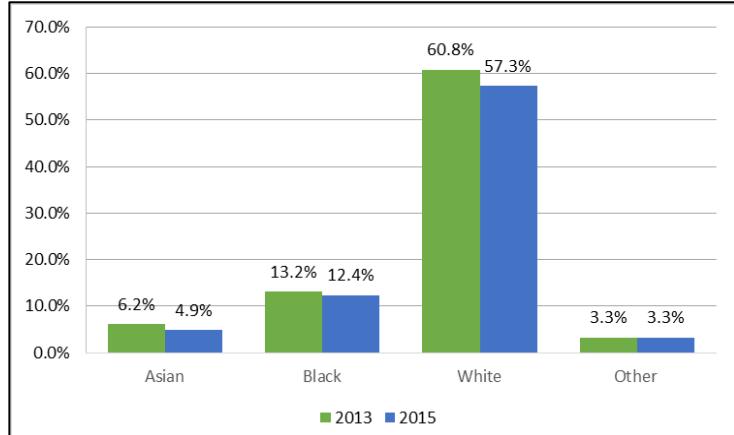

Chart 38

- Age group 35 – 39 has the highest number of physicians practicing in the emergency medicine specialty at a rate of 17.1%, the 2nd highest age group is 40-44 at 15.5%.
- In 2015 57.3% of all emergency medicine physicians are 49 and below and 42.5% are 50 and above.

Emergency Medicine Physicians by Race

Chart 39

- Whites represent 57.3% of emergency medicine physicians, but declined by 5.8%.
- Blacks represent 12.4% a decrease of 6.1% from 2013 – 2015.
- Asians represent 4.9% with a decrease of 20.2% in 2015.

Note: Emergency Medicine was not a core specialty prior to 2013

GLOSSARY OF TERMS

MSA

- *MSA*: Geographical areas with a relatively high population density at its core and close economic ties to a particular area.

PCSA

- *PCSA*: Self-sufficient markets of health care, they are utilized to measure primary care physician supply or geographic access.

Primary Practice and Core Specialties

- *Family Medicine or General Practice*: A family medicine practitioner provides continuing and comprehensive health care for the individual and family. Family medicine encompasses all ages, both sexes, each organ system and every disease entity.
- *Internal Medicine*: An internist is trained in the prevention, diagnosis, and treatment of adult diseases. An internist is not a surgeon. There are several sub-specialties an internist can have, including: specializing in a particular organ, such as the lungs or the kidneys; a particular disease, such as diabetes, or a particular age group, such as the elderly.
- *Pediatrics*: A pediatrician specializes in the overall well-being of children. Most pediatricians treat children from birth to young adulthood. Pediatricians can have sub-specialties such as surgery or pediatric cardiology.
- *Emergency medicine*: An emergency medicine specialist diagnoses and treats unforeseen illness or injury. It encompasses a unique body of knowledge including the initial evaluation, diagnosis, treatment, coordination of care among multiple providers, and disposition of any patient requiring expeditious medical, surgical, or psychiatric care.
- *General Surgery*: General surgery is a discipline that requires knowledge and familiarity with a broad spectrum of diseases that may require surgical treatment. Technical proficiency in the performance of core operations/procedures, clinical knowledge, including epidemiology, anatomy, physiology, clinical presentation, and pathology (including neoplasia) of surgical conditions.

- *Obstetrics and gynecology (OB/GYN)*: OB/GYN is a broad and diverse branch of medicine, including surgery, management of the care of pregnant women, gynecologic care, oncology, and primary health care for women. Most OB/GYNs are generalists and see a variety of medical conditions in the office, perform surgery, and manage labor and delivery.
